RESEARCH INTERESTS

Software Testing, Fuzzing, Software Security, AI for Software Engineering (AI4SE)

EDUCATION

Sogang University M.S. in Computer Science and Engineering (Combined B.S.–M.S. Program) Information Security Lab, Advisor: Prof. Jaeseung Choi	Seoul, Republic of Korea Mar. 2026 – Present
Sogang University B.S. in Computer Science and Engineering (CGPA: 3.89/4.3) (On leave for 2 years: Mandatory military service)	Seoul, Republic of Korea Mar. 2020 – Feb. 2026

RESEARCH EXPERIENCE

Graduate Researcher, Information Security Lab Advisor: Prof. Jaeseung Choi	Sogang University Mar. 2026 – Present
Undergraduate Researcher, Information Security Lab Advisor: Prof. Jaeseung Choi	Sogang University Jan. 2025 – Feb. 2026

RESEARCH PROJECTS

Directed Fuzzing using Large Language Models Collaborative project with the National Security Research Institute - Built a pipeline that leverages LLMs to infer bug-triggering conditions. - Applied a bug-condition-based distance metric to guide fuzzing inputs toward target locations.	Apr. 2025 – Oct. 2025
--	-----------------------

PRESENTATIONS

Korea Software Congress (KSC) 2025, Poster Session <i>Constructing a Korean Legal Multiple-Choice Dataset for Training Large Reasoning Models</i> (in Korean)	Dec. 2025
---	-----------

HONORS AND AWARDS

Combined B.S.–M.S. Program Scholarships, Sogang University - Academic stipend of \$150/month for 8 months. - Full tuition (USD \$6,180) for the first semester of the M.S. program.	Mar. 2025 – Mar. 2026
Excellence Award (3rd Place), Capstone Design Competition Ranked 3rd among 25 teams, Sogang University	Fall 2025

TEACHING EXPERIENCE

Teaching Assistant, Fundamentals of Compiler Construction Assisting the course instructor in managing course projects.	Fall 2026
Teaching Assistant, Introduction to Computer Systems Assisted the course instructor with grading and managing assignments.	Spring 2026
Teaching Assistant, Introduction to AI Programming Taught basic Python programming and related frameworks.	Fall 2024, Fall 2025
Teaching Assistant, Advanced Applied C Programming Taught C programming for building simple applications with algorithm design.	Spring 2025

ACADEMIC SERVICE

Student Volunteer, KIISE SIGPL Summer School 2025

Aug. 2025

- KIISE Special Interest Group on Programming Languages (SIGPL)

SELECTED ACADEMIC PROJECTS

Fundamentals of Compiler Construction | F#

Fall 2024

- Implemented a simplified compiler with a type checker, AST-to-IR translator, and IR optimization.

Operating System | C 🇰🇷

Fall 2024

- Implemented system calls, process scheduling, and virtual memory in PintOS.

Programming Language | F# 🇰🇷

Spring 2024

- Implemented imperative and functional languages with a type checker.

SKILLS

Programming: C/C++, Python, F#, OCaml, Assembly Language (x86-64)

Tools: Git, Docker, GDB, Bash

Languages: Korean (Native), English (TOEFL iBT 5.0/6.0)
